APPLIED NUMERICAL MATHEMATICS

Author Index *

Volume 21 (1996)

Alt, R. and J. Vignes, Validation of results of collocation methods for ODEs with the CADNA library (2) 119–139
Andrade, E.X.L. de, see A. Sri Ranga (2) 175–183
Aro, C.J., A stiff ODE preconditioner based on Newton linearization (4) 335–352
Bendtsen, C., Highly stable parallel Runge–Kutta methods (1) 1– 8
Blaisdell, G.A., E.T. Spyropoulos and J.H. Qin, The effect of the formulation of nonlinear terms on aliasing errors in spectral methods (3) 207–219
Brezinski, C. and M. Redivo Zaglia, Vector and matrix sequence transformations based on biorthogonality (4) 353–374
Briggs, W.L. and V.E. Henson, A table of analytical discrete Fourier transforms (4) 375–384
Butcher, J.C. and Z. Jackiewicz, Construction of diagonally implicit general linear methods of type 1 and 2 for ordinary differential equations (4) 385–416
Causon, D.M., see Crossley, P.S. (2) 141–153
Chehab, J.-P., Solution of generalized Stokes problems using hierarchical methods and Incremental Unknowns (1) 9– 42
Chen, R.-C., see Liu, J.-L. (4) 439–468
Crossley, P.S., R. Saunders, D.M. Causon and C.G. Mingham, A spectral method with subcell resolution for shock wave calculations (2) 141–153
Efraimsson, G. and G. Kreiss, A note on the effect of artificial viscosity on solutions of conservation laws (2) 155–173
Fdil, A., A new method for solving a nonlinear equation with error estimations (4) 417–430
Feldstein, A. and P.R. Turner, Overflow and underflow in multiplication and division (3) 221–239
Ferreira, J.A., Supraconvergence of a class of moving grid methods for solving a nonlinear problem (1) 43– 56
González-Vera, P. and J.C. Santos-León, Properties of certain piecewise polynomial product integration rules (3) 241–264
Hadjidimos, A., see Lai, Y.-L. (3) 265–290
Henson, V.E., see Briggs, W.L. (4) 375–384
Houstis, E.N., see Lai, Y.-L. (3) 265–290
Hsieh, M.-C., see Liu, J.-L. (4) 439–468
Jackiewicz, Z., see Butcher, J.C. (4) 385–416
Khajah, H.G. and E.L. Ortiz, On a differential-delay equation arising in number theory (4) 431–438
Kok, J., see Sommeijer, B.P. (3) 303–320
Kreiss, G., see Efraimsson, G. (2) 155–173
Lai, Y.-L., A. Hadjidimos and E.N. Houstis, A generalized Schwarz splitting method based on Hermite collocation for elliptic boundary value problems (3) 265–290
Lin, I.-J., see Liu, J.-L. (4) 439–468
